Discover Iceland's only  
floating geothermal pools

# BATHE IN ICELANDIC HOT SPRING WATER

Vök Baths is a geothermal destination located on the banks of beautiful lake Urriðavatn in East Iceland. Vök Baths offers a unique bathing experience for everyone. A perfect place to enjoy your wellness and reconnect with nature.

## CREATE MEMORIES

The hot water flowing from the ground at lake Urriðavatn is so pure that it is the only geothermal water in Iceland that is certified as drinkable. Due to this unique fact, we partnered up with a local microbrewery to produce two distinct and delicious Vök beers brewed from the hot water and created a tea bar where you can taste our water with locally sourced organically grown herbs.

## TRY EVERYTHING WE HAVE TO OFFER

In water pool bar

Steam bath

Cold mist tunnel

Stairs to Urriðavatn  
(wild lake)

Tea bar
